

3=1

1. Find 3 random objects around you. – **3 min**
2. Observe the objects. What is their main purpose, function? What is the material like? – **3 min**

3. Put the objects together and create a new object. Visualise your new invention on paper. Describe the object and what it can do. Give it a catchy name. – **10 min**
4. Show and introduce your awesome invention to others! – **4 min**

My new amazing invention is called _____
and it looks like this
