

Techmate. Safer, faster field operations with custom voice AI

We help transform compliance and productivity – without overhauling your systems

Device security

Cloud connectivity

Apps and portals

What is Techmate?

Techmate is a hands-free AI voice assistant platform, tailor-made for complex field operations. We digitize repair, inspection, and data entry – unlocking productivity and compliance without ripping out your existing stack.

Results at a glance

- Cut admin time for field teams
- Automate reporting and compliance
- Reduce errors – boost team safety

Key features and benefits of Techmate

Voice-guided workflow

Step-by-step, hands-free support for repairs, inspections, and documentation – making every tech more effective.

Custom prompts

Built for your exact job routines, asset types, and site conditions.

Instant documentation

Paperless logs, checklists, and compliance records – auto-generated in real time.

Real-time integration

Direct updates to your ERP, IoT, and field management apps – no data re-entry.

Flexible device support

Runs on your team's smartphones, tablets, or rugged devices – easy to scale.

Continuous learning

Field actions and feedback become new training and best-practices – built-in.

Why partner with Proekspert?

Proven, no-nonsense delivery

We guide your team from pain-point to pilot, always focused on measurable business outcomes.

You keep control

No “vendor babysitting” – our role is to equip and enable your team, not create lock-in.

Built for your stack, not ours

No forced migrations – Techmate plugs into your current workflows and tech.

Over 20 years' experience

Trusted by industry leaders for resilient, adaptable digital transformation – at your pace.

How it works

At Proekspert, we guide you through a transparent, collaborative process built for real-world field service challenges, not just theory.

Real use, real benefits

For maintenance leads

Get paperless repair logs, auto-timestamped – no chasing techs for reports.

For field techs

Hands-free inspection protocols – no checklist lost, no step skipped.

For compliance managers

Instant, audit-ready records – cut manual errors to zero.

Results you can expect

- Shorter, safer job cycles – eliminate manual data entry and reduce errors
- Higher technician efficiency and satisfaction – less time on admin, more time solving problems
- Consistent, audit-ready documentation – without interrupting fieldwork
- Seamless integration with your existing systems – no forced migrations or workflow disruptions

Client partnership philosophy

Every solution is a joint effort between your operational experts and our technical team.

We measure success by practical impact – not just “go live,” but lasting improvements in your daily field service outcomes.

Ready for a pilot?

Get your field workflow mapped and a pilot voice assistant running – see practical value in weeks, not quarters.
